Engineering Professional having 3.1+ Years of Software Testing Experience

WORK EXPERIENCE:

Software Test Engineer

 Capgemini Limited, Pune

> *Presently working at **Capegemini** Limited as **Software Test Engineer** since last 3.1 years.*

PROFESSIONAL SUMMARY:

- 3.1+ Years of Industry Experience in the area of Software Testing (Manual and Automation) with sound knowledge of **Test Design, Test Execution and Defect Reporting & Tracking.**
- Effectively Worked on **Agile Methodology** and Active Participation in **Daily Scrum, Sprint Planning, Sprint Review** and **Sprint Retrospective Meetings.**
- Strong understanding of Software Life Cycles i.e. **SDLC**, **STLC and BLC.**
- Experience in Analyzing User Stories and Creating, Enhancing, Executing **Test Cases**, **Test Scripts** and Updating **Requirement Traceability Matrix.**
- Demonstrated excellence in creating Automation Test Scripts using **Core Java, Selenium Web Driver** and **Maven.**
- Implemented **Page Object Model and TestNG** in combination with **Cucumber BDD** Framework.
- Hands on Experience in Automating Web Based Applications in combination with **Cucumber BDD** Framework and **TestNG Annotations**.
- Experience in Performing **Functional Testing, System Testing, Smoke Testing, Regression Testing** and **Re-testing**.
- Expertise in Defect Tracking and Reporting using Test Management Tool like **JIRA.**
- Writing and Executing **SQL Queries** to validate data.
- Expertise in performing **CRUD** operations on **API** using **Postman.**
- Good Experience in Automation of **RESTful API** Test Scripts in combination with **Cucumber BDD framework.**
- Experience in using **GitHub** as a **Version Control Tool** to track the code changes.

TECHNICAL SKILLS:

Testing Tools	Selenium WebDriver, Cucumber, TestNG, AutoIt, Sikuli, Apache POI
Framework	Hybrid-BDD
Version Control Tool	GitHub
Test Management & Defect Reporting Tool	JIRA
Programming Language	Core Java
API Testing Tools	Postman, Rest Assured
Database Management	MySQL
Build Management Tool	Maven

PROJECT PORTFOLIO:

Project Domain	E - Commerce
Tools Used	Core Java, Selenium Web Driver, Maven, Cucumber, TestNG, JIRA, GitHub, AutoIt, MY SQL MS-Excel, POSTMAN, Rest Assured
Framework	Hybrid-BDD
Role	Software Test Engineer (Automation +Manual Tester)

Roles & Responsibilities:

- Responsible for understanding and Analyzing the User Stories.
- Coordinating and Communicating with PO and team for better understanding of functional requirements for developing quality test cases.
- Involved Identifying Test Scenarios and Designing Test Cases using Test Case Design Techniques.
- In Agile Environment, Attending Sprint Planning Meeting and providing estimated time to complete the Testing task assigned in each Sprint and updating task status in JIRA.
- Involved in documenting Requirement Traceability Matrix, Test Cases and Defect Report.
- Involved in Designing and Creating Tests Scripts using Selenium WebDriver with Java.
- Implemented Page Object Model using Page Factory in combination with Cucumber BDD and TestNG.
- Executing Test Scripts with multiple sets of data and Preparing Test Summaries.
- Performing Parallel Execution of Test Scenario in combination with TestNG and Cucumber BDD.
- Performing Smoke Testing, Regression Testing, Retesting, Sanity Testing, Functional Testing and Marking the Status in Test Management Tool.
- Performing non-functional testing such as Sanitization testing and Globalization testing.
- Validating backend data, with respect to operations performed on UI.
- Analyzing dynamic API Document like Swagger and creating Test Scripts by using given(), when(), then() for Automating RESTful API.
- Analyzing the Response and Performing data validation.
- After test Execution, Logging and Tracking Defects using JIRA Tool.
- Generating different types of Test Reports such as Extent Report and Analyzing the Tests Results.

EDUCATION:

Qualification	University	Remark
Bachelor of Engineering	North Maharshtra University	First Class
Diploma	MSBTE	First Class
